### Got2bWireless Bluetooth Car Kits

[got2bwireless.com](http://got2bwireless.com)

Got2bWireless offers its Bluetooth car kits in three different versions, each designed to provide easy installation, an OEM look and feel and universal installation. Got2bWireless G2-2200 is the company's universal car kit, which fits in any vehicle.

The product includes the following features: mute stereo or music on all inbound and outbound calls; caller ID by number; voice commands and digit dialing (phone dependent); wireless audio streaming (A2DP and AVRCP); redial last number and mute or transfer call back to handset. The kit includes the following hardware: a control box (brain), an ISO wiring harness, a microphone, a controller for all operations and an instruction/installation guide.

All car kits have Got2bVoice bundled with them, which allows users to send text messages by voice, have E-mails read back to users, send e-mails, check calendar appointments and Facebook and Twitter updates, all by voice.
